

## Network Diagram:

The focus of our Sprint 4 were the finishing touches to our product.

Prior to starting this sprint, we determined the task of researching how to implement light and dark mode with Bootstrap (**RUN-106**) was one that must be completed relatively early in the sprint to leave time for its subsequent tasks.

In our diagram of 10 tickets/tasks, we determined the critical path, the one with greatest estimated completion time, was the path of **RUN-106**, **RUN-105**, and **RUN-104** (7 days in total).

We we did for every previous sprint, to keep our sprint in schedule we held three standup meetings per week and logged our progress to ensure **RUN-106** (and later **RUN-105**) was completed as soon as possible, and with the necessary prerequisites for the subsequent tickets.
