Runtime Warriors Contract

Our group's main method of communication will be discord. Group members should respond to messages on the same day that they are received.

Stand ups will be on Tuesdays, Thursdays and Fridays:

Tuesday: 3pm [online]
Thursday: 11am [online]
(backup: 7pm)
Fridays: 3pm after lecture. In person UTSC BV473. Will be for sprint planning

Notes: Ivy - everyone will submit their own notes to me and I will collect and organize them

What to prepare: Everyone should be prepared to explain their progress.

Commit regularly on feature branches, push to develop after the feature is fully mature. No broken code should be committed (code should be run before committing). Thursday is the date to finish the tasks. Check the repo every meeting, everyone would review the pull request together.

My Poker Planning-For distributing the work. Everyone will get an even number of story points.

If the group member misses multiple meetings, and they don't have a reasonable explanation, then the situation will escalate to the professor.

In the case of academic dishonesty, the accusation will be forwarded to the professor.

If a group member misses a meeting they must make an absence request on the missing-person-form.

If a person drops out, we shame that person (nicely). And we wish them well, somewhere else :) Furthermore, split up the story points.
